The average effective tax rate of the Group for the fourth quarter 2023 and financial year ended 31 December 2023 were 16.7% (2022: 34.5%) and 24.0% (2022: 31.9%) respectively. The average effective tax rate of 34.5% in the prior period was higher than the corporate tax rate mainly attributed to the one-off Prosperity Tax (Cukai Makmur) applicable for 2022.

The average effective tax rate in the fourth quarter 2023 was lower than 24% and financial year ended 31 December 2023 was at 24% which is the statutory corporate tax rate. The lower effective tax rate in the fourth quarter was mainly attributed to reversal of prior year corporate and deferred tax expenses.

B7. MATERIAL CHANGES IN THE QUARTERLY RESULTS AS COMPARED WITH THE PRECEDING QUARTER

The Group gained 0.3% market share within this quarter as compared with the preceding quarter contributed by the Group's Value-For-Money brands which captured an additional 0.9% of the market share. As the downtrading trend continued within the combustible industry, the Group's Premium and Aspirational Premium brands recorded market share declines of 0.3% each.

The legal industry combustible volume grew by 4.3% quarter on quarter. Within this legal combustibles space, the Group gained 0.3% market share within this quarter as compared with the preceding quarter contributed by the Group's Value-For-Money brands which captured an additional 0.9% of the market share. The Group's share of market in West Malaysia improved by 0.1% while an increase of 1% share of market was observed in East Malaysia as compared to the preceding quarter. The increase in combustible volume alongside the sale of vapour products during this quarter gave rise to 4.8% increase in revenue from RM607 million to RM636 million. In view of the Group's major launches of its Vuse products during the final quarter of the year, sizeable investments were incurred to build brand visibility and credibility. As a result, profit from operations reported a dip of 24.5% from RM85 million to RM64 million as the Group continues to charge forward into a true multicategory business.

B8. REVIEW OF PERFORMANCE YEAR-TO-DATE YEAR 2023 VS YEAR-TO-DATE 2022

Although the tobacco black market incidence had shrunk 1.0% to 55.6% for the year as compared to the previous year, the backflow within the nicotine landscape showed signs of increasing consumer migration towards the growing vapour category which led to an overall volume decline in the legal combustible industry.

Intensified competition within a contracted combustible industry size coupled with a sustained downtrading trend throughout the year increased the pressure on the Group's product portfolio and volumes. The Group saw an overall decline of 0.5% share of market as the Premium brands' share of market declined by 0.9%. However, Value-For-Money (VFM) brands share of market improved by 0.5% owing mainly to the timely launch of Luckies by the Group which presented additional affordable options to consumers. Overall, the Group experienced a significant volume decline for the year as a result of the above factors compounded by the absence of additional volume benefit that the Group experienced in 2022 from the route-to-market changes.

The Group's cost base was impacted due to rising input prices resulting from inflationary pressures as well as depreciation of the Ringgit. Whilst the Group had been actively managing and optimizing costs, the Group had decided on taking a necessary step to increase the prices of some of its brands by 2-3%, marking the first price adjustment since 2018.

Buffered by the encouraging performance of the Group's vapour category launches during the second half of the year, total revenue decreased by 11% from RM2,597 million to RM2,311 million. Operating expenses incurred during the year was 4.9% higher than the previous year as the Group continues to invest into the multicategory business transition. This translated to lower profit from operations by 31% from RM407 million to RM281 million.

B9. CURRENT YEAR PROSPECTS

According to the Central Bank of Malaysia, the country's economic momentum in 2024 is expected to improve with gross domestic product (GDP) set to grow between 4% and 5% driven by robust domestic demand.

Against this backdrop, the Group is cautiously optimistic of achieving an improved financial performance for the coming year, as it continues to build A Better Tomorrow[™], backed by its New Category business. The Group firmly believes that harm reduction strategies are crucial to reducing the health impact of its business. In 2024, the Group will focus on growing the market share of Vuse, which represents the Group's efforts to offer reduced-risk* alternatives to adult smokers.

B9. CURRENT YEAR PROSPECTS (CONT'D)

The Group is supportive of the Control of Smoking Products for Public Health Bill 2023, which was passed during the Parliament session in December 2023. As the Government develops the regulatory framework for tobacco and vapour products under this new law, the Group reiterates that any regulations introduced must be sensible and evidence-based for all stakeholders to ensure that it can be enforced effectively and deliver its intended objectives, without fuelling the growth of the black market.

The tobacco black market incidence in Malaysia remained persistently high at 55.6% for 2023. With the measures announced by the Government during the tabling of Budget 2024, the Group believes that it will further strengthen efforts to combat the tobacco black market and help recover revenue leakages for the Government.
